Please delete the Abstract and there insert

A system and method communicating via an Internet network, the system including:
a plurality of computers connected to a computer system such that one of the plurality of
computers, corresponding to a first of the user identities, and an other of the plurality of computers,
corresponding to a second of the user identities, can send communications, and some of the
communications are received in real time via the Internet. There can be a determination as to
whether some of the communications are allowed.
